

Wellsystem Spa_Complete

For a holistic relaxation experience

While you enjoy your massage, Wellsystem Spa_Complete takes you into a relaxing world of colours, light, aromatic scents and relaxing sounds. Discover the wellness experience for all senses!

Skin caring radiance

The highly intensive Beauty Light increases the body's own production of collagen and cares for the skin. Wrinkles are reduced, the skin is tightened and the overall skin texture can visibly improve with regular use.

Relaxing music

The high-quality sound system complements the massage with relaxing music and meditative sounds. Enjoy your individual music with Bluetooth connect.

Aromatic scents

With special aromatic scents, the massage becomes a complete feel-good experience. The intensity of the fragrance can be individually adjusted. Close your eyes and enjoy the moment.

Increase your wellness experience

Colours and light can increase wellbeing and have numerous positive effects on the body and mind. The LED colour light programmes and the skin-caring LED radiance were developed together with a leading lighting biologist.

Relax

After a stressful day at work or physical exertion, the green light helps you to relax and feel completely at ease.

Recharge

Coloured light with optimally visible orange-red is ideal for re-charging batteries and re-charging energy, for example after physical exertion.

Activate

The sky-blue Activate light brightens the mood and activates body and mind.

Rainbow

With Rainbow you can experience all the colours during the massage and discover the effect of each colour.

Tip:

Keep your eyes open during the use of the colour light programmes.
